

ZAGREB SHOULDER&ELBOW COURSE 2017

March 31 - April 01 2017

Patronage 2017

ZAGREB SHOULDER & ELBOW COURSE
5th

WELCOME

Dear friends and colleagues

Zagreb
Shoulder&Elbow
Course 2017
March 31 - April 01

It is my pleasure and honor to invite you to the 5th Zagreb Shoulder and Elbow Course which will be held in Zagreb on March 31st - April 1st, 2017 in Hotel Dubrovnik, which is situated in the center of Zagreb. The main goal of this Course is the education of young orthopedic and trauma surgeons from all around the Europe, with particular accent on those coming from Central and Eastern European countries. The course has traditionally been supported by European Society for Surgery of the Shoulder and the Elbow (SECEC). We have worked intensively and in close collaboration with our invited speakers to build up very interesting program with highest quality. The accent of the lectures will be on the surgeon approach to the certain subject. On behalf of Organizing Committee I wish you a very warm welcome to the fifth Zagreb Shoulder and Elbow Course.

Prof. Nikola Cicak MD, PhD
Course Chairman

This is a picture of Zagreb's park called Zrinjevac. It is a part of the **Lenuci Horseshoe** (Croatian: *Lenucijeva pothovo*), a unique U-shaped system of city squares with parks in downtown (*Donji grad*) Zagreb. The horseshoe was conceived in 1882 by Croatian urbanist Milan Lenuci. The parks were projected between 1883 and 1887, at a time when today's Donji grad formed the southern outskirts of Zagreb. In 1889 the entire horseshoe was finished—its two ends were connected by the newly built Zagreb Botanical Garden. The park system consists of seven squares aligned on three straight lines. Its Eastern part with park Zrinjevac can be reached with just few minutes walk south-east from venue place of our Course.

PRELIMINARY PROGRAMME

Zagreb
Shoulder&Elbow
Course 2017
March 31 - April 01

Friday, March 31

SHOULDER INSTABILITY

Stephano Gumina	<i>Scapular dyskinesis</i>
Mario Boroni	<i>First time shoulder dislocation in a patient under 20 years old athlete: nonoperative or surgical treatment?</i>
Nikola Cicak	<i>Surgical treatment of overhead athletes with shoulder instability</i>
Przemyslaw Lubiawski	<i>Arthroscopic Bankart versus Latarjet procedure</i>
Ofer Levy	<i>Risk factor for surgical failure in recurrent anterior shoulder dislocation</i>
Paolo Paladini	<i>Latarjet procedure is a realistic or trendy procedure</i>
Emilio Calvo	<i>Recurrent anterior shoulder dislocation after the Latarjet procedure</i>
Nikola Cicak	<i>Posterior shoulder instability: when and how to stabilize shoulder</i>

WORKSHOPS

Hrvoje Klobucar, Damir Starcevic: *ACP - Autologous Conditioned Plasma - Arthrex*
Nikola Cicak: *Arthroscopic knot and suture management - Johnsone-Johnson*

ROTATOR CUFF TEARS

Stephano Gumina	<i>The natural history of rotator cuff tears</i>
Hrvoje Klobucar	<i>Ultrasound evaluation of the rotator cuff tears</i>
Nikola Cicak	<i>Arthroscopic transtendon fixation of articular supraspinatus partial tear</i>
Ofer Levy	<i>Arthroscopic repair of full-thicknes supraspinatus tear; preferred techniques</i>
Emilio Calvo	<i>Arthroscopic repair of anterosuperior rotator cuff tear</i>
Paolo Paladini	<i>Arthroscopic repair of posterosuperior rotator cuff tear</i>
Bartek Kordasiewicz	<i>Arthroscopic repair of isolated subscapularis tear</i>
Mehmet Demirhan	<i>Risk factors for failure after arthroscopic rotator cuff repair</i>
Mario Boroni	<i>Arthroscopic treatment in overhead athlete with combination of lesions (partial supraspinatus tear, posterior labrum tear, SLAP lesion). What to fix? Me approach.</i>

DINNER

Saturday, April 01

ARTHROPLASTY AND FRACTURES

Dragan Djurdjevic	<i>Current treatment of acute proximal humeral fracture</i>
Hrvoje Klobucar	<i>Arthroscopic treatment of the stiff shoulder following injury</i>
Jeno Kiss	<i>Surgical treatment of the proximal humerus malunion and nonunion</i>
Emilio Calvo	<i>Complex proximal humerus fractures in the elderly: Is arthroplasty a good option?</i>
Marius Scarlat	<i>Proximal humeral fractures: hemiarthroplasty or reverse shoulder arthroplasty</i>
Ofer Levy	<i>Current trend in shoulder resurfacing arthroplasty and stmeless implants</i>
Nikola Cicak	<i>Management of fracture sequaele of the proximal humerus</i>
Marius Scarlat	<i>Revserse shoulder arthroplasty for failed hemi ot total shoulder arthroplasty</i>

WORKSHOP

Cicak Nikola, Filipic Aida, Pavica Gorupic, Martina Zunac:
Rehabilitation pearls after rotator cuff repair and shoulder replacement

ELBOW

Przemyslaw Lubiawski	<i>Clinical examination of the elbow</i>
Damir Starcevic	<i>Surgical approaches to the elbow</i>
Ivan Bojanic	<i>Surgical treatment of OCD of the elbow</i>
Przemyslaw Lubiawski	<i>Arthroscopy for lateral epicondylitis</i>
Bo Olsen	<i>Open surgical treatment of elbow instability</i>
Raul Barco	<i>Stiff elbow: Open arthrolysis</i>
Ivan Bojanic	<i>Arthroscopic arthrolysis</i>
Damir Starcevic	<i>Arthroscopic treatment of elbow osteoarthritis</i>
Mehmet Demirhan	<i>Radial head fractures</i>
Raul Barco	<i>Fracture dislocation of the elbow</i>
Jeno Kiss	<i>Surgical treatment following malunion of the distal humerus fractures in children</i>
Bo Olsen	<i>Current status of elbow arthroplasty</i>
